

# SCRAMBLED WOMEN TECS I

by Mark Lagasse

Over the last two AHMMs, our puzzles featured female mystery authors, so now it's time for some female fictional detectives. In this issue and the next we will be paying tribute to 20 of these characters with a little anagramming fun. Simply unscramble the letters of each numbered entry to spell the full name of a woman whodunit sleuth. For example, BARON AND JAY would be Joanna Brady.
